General Description

Q Microwave's PN 102256 is a frequency-agile RF Downconverter capable of converting frequencies centered between 0.5 and 18 GHz, with 1 GHz of instantaneous bandwidth.

The 1000 MHz IF frequency range is centered at 2300 MHz (1800 to 2800 MHz).

This module is configured to use two externally provided Local Oscillator (LO) inputs in order to provide a higher degree of flexibility and customized applications.

Digital control is provided through a Micro-D connector.

The unit is packaged in a rugged housing with hermetical seals and internal potting in order to provide higher reliability in difficult environments.
